EDUCATION

B.E. Computer Science (Data Science) – New Horizon College of Engineering

CGPA: 9.25/10 | Expected 2027

PUC – Jyothi Nivas PU College | **89.83%**

TECHNICAL SKILLS

Languages: C++, C, Python, Java

Data & ML: Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering

Visualization: Matplotlib, Seaborn, Tableau

Web & Backend: HTML, CSS, REST APIs, FastAPI (learning)

Databases: SQL, Supabase

Tools: GitHub, VS Code, Hugging Face

PROJECTS

Researcho – AI-Powered Research Assistant (Nov 2025)

- Developed an NLP system using transformer-based models for research paper summarization and semantic search
- Implemented vector embeddings and similarity search using FAISS
- Enabled efficient retrieval using cosine similarity over high-dimensional embeddings
- Built interactive UI using Streamlit for real-time query processing
- Deployed on Hugging Face Spaces (GPU) for scalable inference

SpendWise – Full-Stack Expense Management System (May 2025)

- Developed a full-stack application using ReactJS and Supabase
- Implemented secure authentication and real-time database updates
- Designed responsive UI for expense tracking and categorization
- Deployed on Vercel for scalable usage

Employee Data Analysis & Visualization (Dec 2024)

- Performed exploratory data analysis (EDA) on employee dataset using Python, Pandas, and SQL
- Identified attrition trends and performance insights
- Built visualizations using Matplotlib and Seaborn
- Delivered data-driven recommendations for improving retention

CERTIFICATION

Python for Data Science, AI and Development – IBM (Mar 2024)

ADDITIONAL

Soft Skills: Problem Solving, Communication, Team Collaboration, Time Management

Languages: English, Kannada, Hindi (Conversational)

Interests: Tech communities, collaborative projects, continuous learning
